

Variation 6

6

Right Hand Technique(s) and Objectives fast detaché, light spiccato

- Develops the coordination of going back and forth between a scrubby detaché and a middle of the bow spiccato

Touchpoints

Instructions

Stroke 1: Begin the 1st bow stroke a little below the middle of the bow. Lean into the stick with the index finger to ensure a good connection with the hair.

Strokes 2-12: Play detaché strokes using a consistent amount of bow for each stroke so that they sound even.

Stroke 13: This down bow stroke will lift off the string, setting the bow in position to bounce. Roll the hand so that the bow tilts more toward the scroll. Your wrist should elevate and hopefully you can feel the transference of contact on the index finger from the middle knuckle to the pad of the finger. The pad is how you will support the bow during the spiccato.

Strokes 13-18: Play a light, controlled spiccato. Work for evenness in rhythm and consistency in bounce height.
